

The Engineers Reuse Collective

UK2026 

The Engineers Reuse Collective is a not-for-profit group of practising engineers championing, accelerating and delivering reuse in the built environment to support the transition of the UK's built environment to Net Zero Carbon.

WHAT tERC DOES

Four pillars of activity

Implement
We promote and implement reuse in the built environment through information sharing and positive engagement with stakeholders.

Demonstrate
We actively demonstrate and share knowledge of effective solutions, overcoming barriers, success stories and lessons learnt.

Champion
We challenge, encourage, and champion our clients and those we work with to maximise reuse.

Advocate
We provide a proactive, influencing, and collective voice for engineers to promote increased reuse.

How we work

We bring together engineers, contractors and other interested parties to share knowledge, develop guidance, and make reuse the norm on projects.

We run events, publish case studies, develop technical guidance and resources to support and accelerate greater reuse in practice.

We actively engage in wider dialogues about policy, regulation, and industry practice, to promote and champion greater reuse.

OUTREACH: PRESENTING AT AJ RETROFIT LIVE

COLLABORATION: SUPPORTING INDUSTRY INITIATIVES

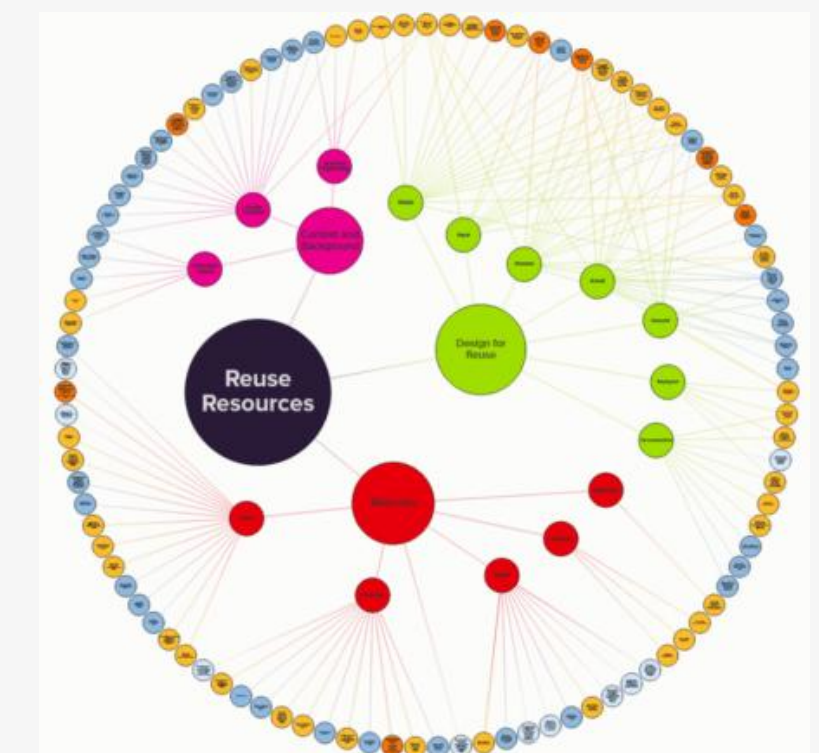

OUTREACH: PROMOTING REUSE

COLLECTIVE EVENT: TALKING REUSE

PRACTICAL RESOURCES

Guidance resources developed collaboratively by member firms, with more in development.
